SUMMARY

Results-driven Cyber Security Engineer with 2+ years of experience in threat detection, vulnerability management, Identity and Access Management (IAM), and secure network engineering. Proven track record of responsibly disclosing vulnerabilities to global organizations including NASA, BBC, WHO, and UNESCO, earning 20+ Hall of Fame recognitions. Reduced spoofing attacks by 80% through hardened DNS protocols (SPF, DKIM, DMARC) and cut phishing risks by 60% via advanced email security monitoring. Experienced in customizing Wazuh SIEM with tailored decoders and detection rules for SONiC network operating systems, and in IAM automation using OKTA and Auth0. Contributed to open-source network security through SONiC BGP CLI enhancements using IS-CLI and BFPD container integration. Adept at analyzing attack surfaces, applying zero-trust principles, and building resilient, compliance-ready security architectures.

TECHNICAL SKILLS

- **Security Domains:** IAM, MFA, SSO, OAuth, Email Security (SPF, DKIM, DMARC), Penetration Testing, Vulnerability Assessment, SIEM, Zero Trust, Incident Response, Network Security
- **Programs:** Python, C, Java, React
- **Tools & Platforms:** Cisco Packet Tracer, Wazuh, OKTA, Auth0, Burp Suite, Spring Boot, Burp Suite
- **Networking and Protocols**
- **Operating Systems:** Linux (kali), Windows

HOBBIES

- Cyber security Research
- Numismatics (Collecting currencies & coins)
- Book Collection

EDUCATION

B.E. in Computer Science
Mepco Schlenk Engineering College
Sivakasi | Sept 2019 – May 2023 | CGPA: 7.6/10

WORK EXPERIENCE

PalC Networks Pvt. Ltd | Software Engineer
Chennai | Aug 2025 – Present

- Engineered a real-time network security monitoring solution using Java (Spring Boot) and react, enabling continuous device health logging, anomaly detection, and threat visualization across the infrastructure.
- Contributed to SONiC (Software for Open Networking in the Cloud) by enhancing BGP CLI using IS-CLI framework; improved the BFPD (BFD Protocol Daemon) container integration to streamline BGP session management and fault detection on open networking platforms.

PalC Networks Pvt. Ltd | Project Engineer
Chennai | June 2023 – July 2025

- Hardened email security posture by configuring SPF, DKIM, and DMARC records, reducing phishing risks by 60% and mitigating spoofing attacks by 80% across client domains.
- Simulated and troubleshot routing and VLANs using Cisco Packet Tracer; identified issues in ICMP, ARP, and DNS protocols.
- Conducted vulnerability assessments on WordPress environments, identifying information leakage and security misconfigurations; developed and executed corrective action plans to remediate findings.
- Customized Wazuh SIEM with tailored decoders and rules to detect anomalies and security events specific to SONiC (Software for Open Networking in the Cloud) network operating system; enabled

LANGUAGE

Tamil (Native), English (Upper Intermediate)

ACTIVITIES AND HONORS

- Ranked among Top 15 in NCPIII – Q3 2024 for cyber security excellence
- Earned 20+ Hall of Fame recognitions for responsibly disclosed vulnerabilities across global organizations including NASA, BBC, WHO, UNESCO, and others.
- Active contributor on YesWeHack.
- Honored with “**Extra miller**” award from PalC Networks as extra performer.

CERTIFICATES

- [Certified WIFI Pentesting 101](#)
- [Certified API Pentesting & Bug Bounty 101](#)
- [Network Analysis](#)
- Mastercard - Cybersecurity Job Simulation

real-time alerting for BGP route changes, interface flaps, and unauthorized configuration modifications across NOS environments.

PalC Networks Pvt. Ltd | Software Intern Chennai | Feb 2023 – June 2023

- Implemented and administered Identity and Access Management (IAM) solutions using OKTA, Auth0, and OAuth, enforcing zero-trust access controls across enterprise systems.
- Focused on credential management, password synchronization, and policy enforcement in identity management.
- Implemented access management practices including Multi-Factor Authentication (MFA), Single Sign-On (SSO), Federation, and Privileged Access Management (PAM) to enhance security and control.
